Description:

The E-360EE burden carrier is a UL Approved Type EE Powered Industrial Truck.

It stands out with superior maneuverability and safety. Rear batteries increase weight on the traction drive, enhancing the braking performance with a short stopping distance. Steering is smoother thanks to less weight on the front axle.

Low maintenance is guaranteed by dependable automotive differential and disc brakes, with large bolt-on discs.

Benefits:

RUGGEDNESS. Automotive ring gear differential, axle shafts on roller bearings.

DEPENDABILITY. Large automotive self-adjusting disc brakes.

MANEUVERABILITY. Short turning radius. Less weight on front axle.

COMFORT. Bucket seats on slide adjusters.

STURDINESS. 14-G diamond-plate steel, tubular frame.

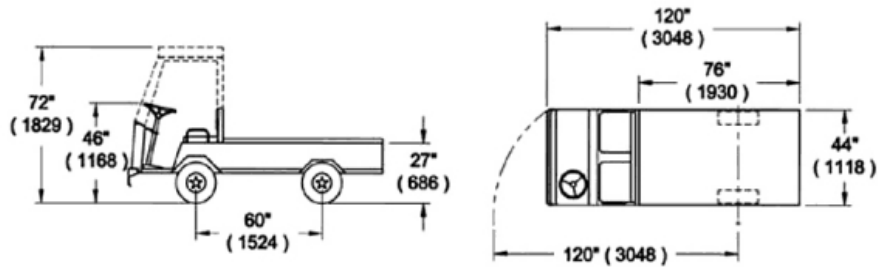

DURABILITY. Bolt-on front bumper.

E-360EE

Vehicle shown may have optional accessories

Dimensions:

Standard Equipment & Features

Type: 36-volt Burden Carrier EE Rated	Brakes: Rear hydraulic brakes, 11
Capacity: *2,000 lb. (906 KG)	Steering: Automotive steering wheel
Speed: 10 mph (16 km/h)	Suspension: Dual leaf springs on front and rear
Motor: 10 hp	Seats: Two bucket seats on slide adjusters
Controller: Electronic speed controller	Indicators: Battery status indicator
Battery: Six 6V-220AH batteries	Safety features: Deadman seat switch, reverse alarm, Horn
Charger: High-Frequency Charger, improves battery performance, prevents current surge, 50/60HZ, 110/220VAC	Lights: Dual head lights, dual tail/brake lights
Transmission: GOODYEAR Eagle Synchronous drive	Accessories: Bolt-on Front Bumper
Drive axle: Differential with automotive ring gear	Wheels: 5.7x8 LRC pneumatic tires
	Unit weight: 1,650 lb. (750 kg) w Batteries
	Certifications: Conforms to requirements for Type EE as stated in O.S.H.A. standard section 1910.178 (Powered Industrial Trucks)

Notes: *includes passenger weight of 200 lbs. Specifications and standard equipment are subject to change without notice.
